SUMMARY

B.Tech Computer Science and Engineering student specializing in Cyber Security, with a strong interest in cybersecurity, network defense, ethical hacking, penetration testing, and threat detection. Building practical skills through hands-on projects, certifications, and security labs. Eager to apply technical knowledge to real-world cybersecurity challenges and continuously develop expertise in security engineering.

PROJECTS

Agentic AI for Smart Traffic Management | React, Node.js, MongoDB, Docker, Jenkins

- Built an **agentic AI-based traffic management platform** for real-time traffic monitoring and signal optimization.
- Designed a **multi-agent AI pipeline** to predict traffic congestion and optimize signal timings for improved traffic flow.
- Implemented **JWT authentication**, **OAuth 2.0**, **Docker**, and **Jenkins CI/CD** to support secure, scalable, and scalable deployment.

FORENSIC-AI: Intelligent Deepfake Video Detection for Digital Forensics

- Developed an **AI-powered deepfake detection system** to identify manipulated videos and support **Digital Forensics** investigations.
- Designed a multi-branch **deep learning architecture** integrating **Vision Transformers**, **frequency analysis**, and **temporal attention** for advanced **deepfake detection**.
- Achieved **97.31% AUC** on unseen datasets, demonstrating strong **model generalization**, **detection accuracy**, and real-world performance.

Smart Healthcare Monitoring System | ESP32, Arduino, MLX90614, MAX30102, ThingSpeak, IoT

- Developed an **IoT-based healthcare monitoring system** to measure and display real-time temperature, heart rate, and SpO₂ using **MLX90614** and **MAX30102** sensors.
- Integrated **ESP32** with **ThingSpeak** to transmit and store patient vital data in the cloud, enabling real-time remote monitoring.
- Built a **web-based patient monitoring interface** with user authentication and real-time health data visualization for remote tracking of patient vitals.

EDUCATION

NIIT University B.Tech in Computer Science and Engineering Specialization: Cyber Security (CGPA: 6.67/10)	Neemrana, Rajasthan 2023 - 2027
Sri Nalanda College Class XII 80%	Bhadradri Kothagudem, Telangana 2023
Sri Chaitanya School Class X	2021

TECHNICAL SKILLS

Programming Languages: Python, Java
Web Technologies: HTML, CSS, JavaScript
Operating Systems: Linux, Windows
Cybersecurity Tools: Wireshark, Nmap, Kali Linux
Development Tools: Git, GitHub, Docker, Jenkins, Visual Studio Code
Design Tools: Figma, Canva
Productivity Tools : Microsoft Office (Word, Excel, PowerPoint)

CERTIFICATIONS

Tata Cybersecurity Analyst Job Simulation | Forage | [View Credential](#)
Networking Basics | Cisco Networking Academy | [View Credential](#)

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

House Captain NIIT University - Led the Orange House team in university events, sports, and cultural activities. - Coordinated team members and supported event execution.	Dec 2025 - Present
Operations Lead siNUoid NIIT University - Managed event operations and coordinated volunteers. - Assisted in planning and executing technical fest activities and on-ground operations.	Jul 2024 - Dec 2024
Volunteer TEDxNIITUniversity - Assisted in guest coordination and event management. - Supported TEDx event execution and on-ground assistance.	Jan 2024 - May 2024
Volunteer ingeNUity Fest NIIT University - Assisted in organizing cultural events and activities. - Collaborated with the organizing during event activities and on-ground coordination.	Jan 2024 - May 2024
Operations & Capture Volunteer siNUoid - Contributed to event planning, coordination, and on-ground operations for student-led initiatives. - Managed content capture and event documentation.	Jul 2023 - Dec 2023
